Chairman Message

集团董事主席献词

“The adversity of the pandemic is the perfect example for how life is filled with uncertainties”

It is my great pleasure to share our 51st edition of Galaxy Bulletin with you. I would like to take this opportunity to extend my warmest greetings to all of you and we hope to provide an update of our company activities through this issue of the Galaxy Bulletin.

The past two years have been very challenging for all of us. The COVID-19 pandemic not only affected our jobs, health, and businesses, but also caused the death of our loved ones. As we move into mid-2022, I am encouraged by the sight of the light at the end of tunnel as we collectively move towards the endemic and take with us the valuable lessons from our losses and a newfound appreciation for life.

The pandemic has challenged us to be more creative and to look for new ways to grow our business. A post covid world creates a new landscape in customer needs, demands, preferences, and purchase patterns. Galaxy Group is implementing new approaches in digital and online marketing to reach to our customers through alternative sales channels. I strongly believe adversity is a nature's way of telling us to look for an alternative way to thrive!

The adversities from the pandemic has taught us to reimagine resilience and confidence as we embark on a path of recovery for our business. Staying hungry and motivated in the face of adversity is key to the accelerated recovery of our business. Although we can't control the direction of the wind, we can certainly adjust our sails to get to our destination, as skilled sailors are trained in the roughest of waters.

I hope you enjoy reading this issue of Galaxy Bulletin. Stay Safe and Stay Healthy!

Smart Hybrid Classroom Solution Training

University Malaysia of Computer Science & Engineering (UNIMY) is an independent private university located in Cyberjaya; Malaysia's global tech hub. UNIMY was founded in 2013 with the aim of Creating a Digital Nation and it nurtures students for the challenges of Industrial Revolution 4.0 (IR 4.0) and digital transformation of future employment.

The Covid-19 pandemic has created challenges and caused disruption across the Higher Education sector; university campuses closed, and face-to-face teaching and assessment shifted to an online format. Hybrid learning makes it easier to stagger how many students are in a class at the same time, limiting the number of students on campus at any given time. It also makes hybrid learning a practical solution for attending classes during the pandemic where students can access classes from home or a dorm room and they won't have to miss out on critical instructional time just because they are sick.

UNIMY has implemented a hybrid learning environment in order to provide flexibility and a safer option for lecturers and students to stay home when they are sick, reducing the spread of viral infection. Galaxy International Sdn. Bhd. (GI) was honoured to be appointed as the supplier for the hybrid learning classrooms in UNIMY .

马来西亚电脑科学与工程大学的混合学习教室

马来西亚电脑科学与工程大学（UNIMY）是一所位于马来西亚全球科技中心赛城的私立大学。这所大学成立于 2013 年，宗旨是协助创建数字国家，培养学生应对工业革命 4.0 (iR 4.0) 和未来就业数字化转型的考验。

严峻的冠病 (Covid-19) 疫情，造成高等教育部门的混乱和困难，大学校园被逼关闭、面对面教学和评估转在线上进行。混合学习可以更轻松地将一个班级同时有多少学生的问题错开，从而限制任何时间在校学生的人数。混合学习很实用的解决了疫情期间上课的问题，学生可以在家中或宿舍上课，也不会因生病而错过关键的教学时间。

马来西亚电脑科学与工程大学实行的混合学习，让讲师和学生在疫情期间有更灵活和安全的学习环境，即使生病也可以留在家中上课，减少受到病毒的感染。宇宙国际私人有限公司 (GI) 很荣幸获选为马来西亚电脑科学与工程大学混合学习教室的供应商。

Visit From Industrial Experts

The Fourth Industrial Revolution (iR4.0) is changing how we live, work, and communicate and we can already see changing business models and employment trends. According to The World Economic Forum, an estimated 65% of kids enrolling in primary education today will end up working in jobs that haven't been created yet and 50% of all employees will need reskilling by 2025

It is very important for our future graduates to be equipped with a qualification that incorporates future-proof, employable skills that will serve them competently within their organizations and also contribute to society and the nation as the need arises. LinkedIn, the world's largest professional network on the Internet, predicts there will be 150 million new technology jobs globally in the next five years. Therefore, it is anticipated that reskilling and upskilling budgets of enterprises and organizations are likely to increase to meet the skills gap. The Malaysia Digital Economy Blueprint 2021 highlighted that the digital economy will become the foundation of the modern economy, thus requiring skilled labour to fulfil this national mandate. A group of experts from higher institutions and consultancy companies have visited us to discuss on the upskilling and Reskilling program through our Class2U platform and ETA professional certification. During the visit, various types of collaboration were discussed and few ETA certifications have been identified.

Galaxians in ACTION FOR FLOOD VICTIM

On 16 December 2021, a tropical depression made landfall on the eastern coast of Peninsular Malaysia, bringing torrential downpours throughout the peninsula for three days. The resulting floods affected eight states across the peninsula, and left at least 54 dead and 2 missing. It was the worst flood that has hit the state of Selangor, especially the district of Hulu Langat, city of Shah Alam, and Kuala Lumpur. The township of Taman Sri Muda, located at Shah Alam, recorded 14 deaths. The township was entirely flooded and suffered catastrophic damage.

A few Galaxians fell victim to the flood but were thankfully not seriously affected. Unfortunately, one of our staff, Mr. Syahril Emran, from Scientific and Technical Products was badly impacted by the flood. His Family home was submerged and most of their household items and belongings including vehicles were destroyed.

A team of 8 Galaxians from the Love and Caring society of Galaxy Recreation Council (GRC) went to Mr. Syahril's house to help out with cleaning and restoring household items. The Company, GRC club and Galaxians have donated money and extended a helping hand to show our support and generosity. The support was able to lighten the burden faced by Mr. Syahril and family during such difficult times. We would like to thank the Galaxians for their help and contribution on behalf of Mr. Syahril and family.
